Autonomous Legal OS

CaseLine – Autonomous Legal OS & AgreementStudio

Bilingual (English + Hindi) contract governance and litigation management for India

50M+ pending cases (NJDG) | 1 platform | 2 languages

IT Act 2000 aligned · Works offline · Open source

India's legal workflow is failing on four fronts.

Docket Crisis

50M+ pending cases; manual diaries cause limitation lapses under the Limitation Act, 1963.

Language Barrier

Contracts are in archaic English; most citizens transact in regional languages.

Conveyancing Pitfalls

Leases over 11 months need registration (Registration Act s.17); stamp duty errors cause disputes.

Fragmented Tools

WhatsApp, paper files, manual billing, no audit trail.

One platform, two engines

Integrated contract generation and litigation management engineered for Indian legal workflows

Engine 1

AgreementStudio

Statutory Drafting & Verification

- **Bilingual drafting:** Simultaneous English and formal Devanagari Hindi legal instruments.
- **14+ Indian templates:** leases, commercial NDAs, powers of attorney, promissory notes, and employment pacts.
- **Statutory rule compiler:** Hard checks for Registration Act s.17 compulsory registration and state stamp duty calculations (Delhi, Maharashtra, UP, Karnataka).

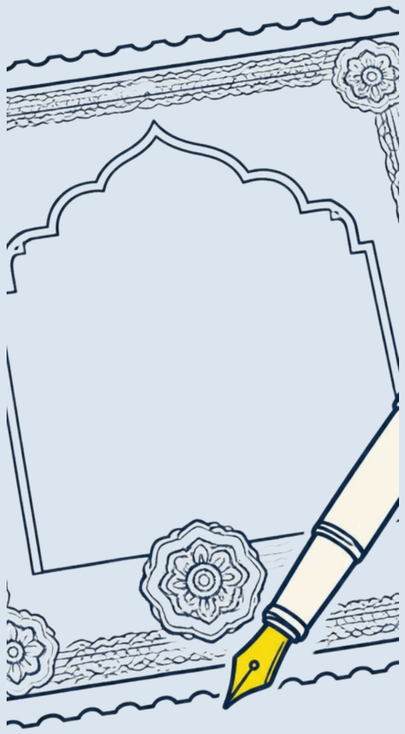

Engine 2

Litigation OS

Chamber Operations & Intelligence

- **Case dossiers:** Complete digital case files with structured party histories, pleadings, and orders.
- **Court calendar & limitation alerts:** Automated diarying mapped to limitation periods to eliminate default dismissals.
- **AI Copilot & e-signatures:** Clause-level risk and fairness scoring with audit-trailed, tamper-evident digital signing.

Four features that set CaseLine apart

Dual-language engine

English and formal Hindi side by side, amounts in words in both ("₹28,000" → "अट्ठाइस हज़ार रुपये मात्र").

Describe-to-Agreement

Type "2BHK in Noida, Rahul, ₹28k/month, 11 months", and all fields auto-fill.

Risk & Fairness Meter

Score 0–100 from landlord or tenant view, with one-click balanced rewrites.

Tamper-evident e-sign

Typed or drawn signature, IP + device + UTC timestamp, QR verification, linked to the case file in one click.

From deal to signed PDF in minutes

An autonomous, compliant drafting lifecycle replacing days of manual clerical ping-pong

1

Describe the deal

Natural language details or voice input

2

Auto-extract parties & terms

Parties, rent, tenure & security deposit

3

Statutory check

Section 17 rule & state stamp duty

4

Bilingual draft

Side-by-side English + Devanagari Hindi

5

AI risk audit

0–100 fairness score & clause balance

6

E-sign + QR + PDF

QR verification & timestamped audit

Result: Execution completed in minutes instead of days. Full statutory compliance without legal administrative lag.

100% Deterministic Compliance

Reliable by design: AI enhances, rules guarantee

Four-tier architecture separating non-deterministic LLM assistance from statutory rule execution

Tier 1 · Client	**Next.js + React PWA (Mobile-First): Touch-friendly signature canvas, offline caching, and responsive legal docket views.**
Tier 2 · Logic	**Role-Based Access & Rule Compilers: Admin, Partner, Associate, Paralegal, and Client roles; agreement compiler; Registration Act s.17 logic; limitation calendar engine.**
Tier 3 · AI Engine	**Google Gemini + Deterministic Local Fallback: Contextual extraction and risk scoring; offline rule templates work with no API key or internet.**
Tier 4 · Data	**Prisma ORM + PostgreSQL / SQLite: Complete cryptographic audit trail, immutable signing metadata, and zero-data-leakage architecture.**

Why we win

Capability	CaseLine	Legacy practice software (Clio, etc.)	Generic AI chatbots
Indian statutory logic (s.17 & Stamp Acts)	✔ Native	✘ None	✘ None
Native Hindi legal drafting (Devanagari)	✔ Full	✘ None	Partial (Unverified)
Contract studio + case management in one	✔ Unified	Partial	✘ None
Audit-trailed e-signature (IT Act 2000)	✔ Built-in	Partial (Paid add-ons)	✘ None
Hallucination-safe rule engine	✔ Guaranteed	n/a	✘ Prone
Offline-capable (PWA local mode)	✔ Yes	✘ Cloud-only	✘ Cloud-only

Engineered specifically for the Indian subcontinent

A large market with a simple pricing ladder

Market (estimates)

- **1.5M+** advocates
- **70,000+** chambers and legal departments
- **Tens of millions** of rental/commercial agreements annually

Plus: Pay-per-draft API for PropTech and FinTech.

Pricing

Free

₹0

3 cases
5 agreements/month

Chamber Pro

₹1,999

per advocate/month

Enterprise

₹9,999

per month

Proof of build

Production-grade architecture is already completed, validated, and open source.

34

dynamic routes

Full app coverage across docket, agreements & signaturesCase Line

8/8

automated tests

Deterministic statutory & limitation suits passing

PWA

mobile-optimised

Touch-friendly e-sign canvas with offline caching

OSS

open source

Seeded with realistic Indian law-chamber records
